

# Business **PROFILE**

# About Company

Established in 2017, MCP – Metal Corrosion Protection is a Specialized provider of industrial surface preparation and protection services. The company is known for delivering high-quality, durable solutions tailored to the needs of industrial clients. MCP's services help enhance equipment life, improve corrosion resistance, and maintain structural integrity across a range of heavy-duty applications.

The team prides itself on professional execution, safety standards, and industry expertise, using the latest equipment and techniques to achieve superior results.

*Whether you need protective coatings, corrosion and rust removal, or professional rubber lining applications, our comprehensive service offering is designed to enhance the performance, protection, and lifespan of your equipment and infrastructure.*

# Core Services

## Sandblasting

Precision sandblasting to remove rust, old coatings, and surface contaminants, preparing substrates for coating.

## Corrosion Protection

Application of protective coatings to safeguard metal surfaces from rust and environmental damage.

## Rubber Lining

High-performance rubber lining to protect equipment from corrosion, abrasion, and chemical exposure.

## On-Site Services

Mobile sandblasting and surface treatment solutions directly at client sites to minimise downtime and transport costs.

# Industries & Sectors Served

MCP provides tailored solutions to a wide variety of industrial sectors, including:

## **Oil & Gas**

Pipelines, storage tanks, offshore platforms & rigs.

## **Marine**

Ship hulls, containers, barges, and port equipment.

## **Construction & Structural Steel**

Beams, bridges, overpasses, and building frameworks.

## **Mining & Heavy Equipment**

Mining trucks, conveyors, crushers, processing plants.

## **Power Generation**

Power plants and renewable generation infrastructure.

## **Manufacturing & Fabrication**

Pressure vessels, tanks, custom steelwork, and industrial machinery.

# Company Strengths

## Business Description

MCP – Metal Corrosion Protection is a South African industrial coatings specialist, delivering expert sandblasting, corrosion protection, on-site blasting, and rubber lining services to extend equipment life and enhance performance across heavy industries.

## Company Strengths

- Established Reputation:**  
Since 2017, MCP has built a trusted presence in the industrial surface treatment sector.
- Comprehensive Services:**  
From surface preparation to corrosion protection and Specialized rubber lining.
- On-Site Capabilities:**  
Mobile blasting options reduce downtime and logistics challenges.
- Commitment to Quality:**  
Focus on safety, precision, and long-lasting performance.
